I am striving for all A+ ratings. If there is a problem with this product that makes it less than A+ please let me know and I will do my best to remedy that.

Build a Snow Fort

Adding to 10

This snowball adding to 10 activity is a great hands-on tool for practice addition facts.

To prepare:

Print pages 4-8 on card stock and/or laminate for durability.

Cut out the addition fact cards and snowballs

Optional: You can use white pom poms in place of the snowballs for a more multi-sensory experience.

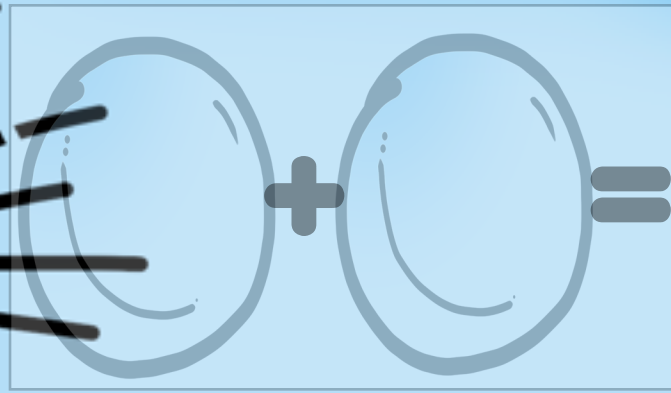

To use:

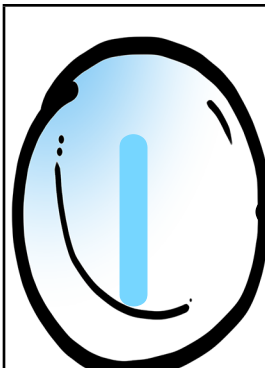

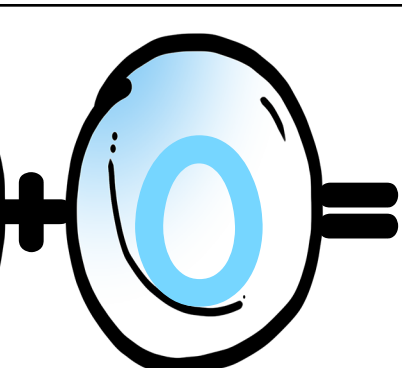

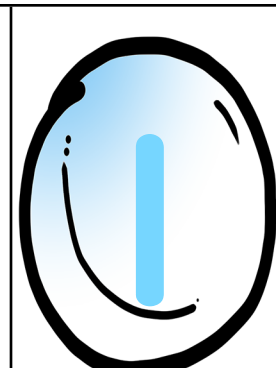

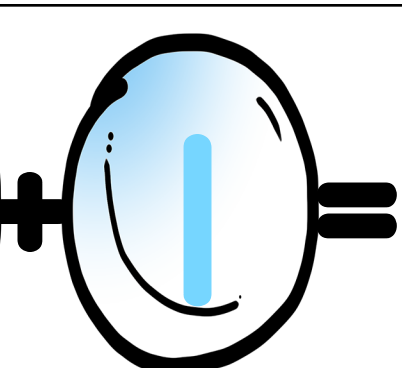

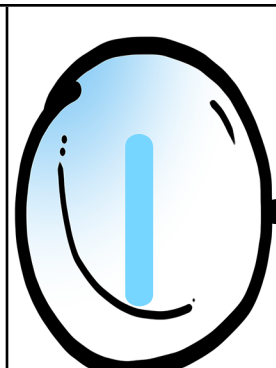

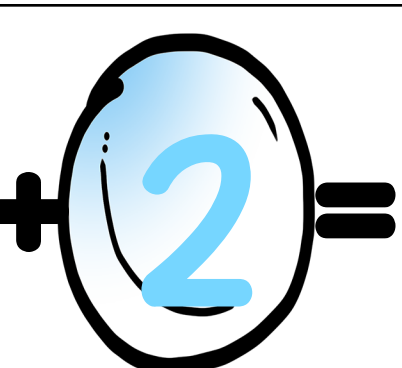

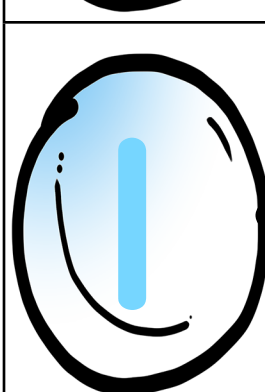

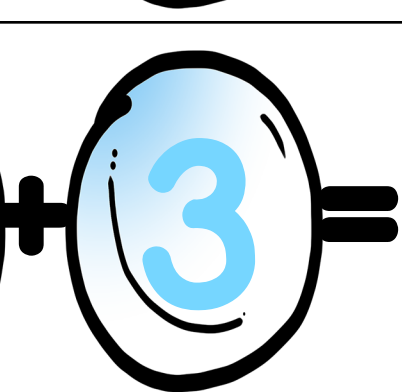

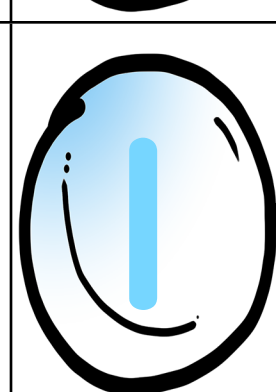

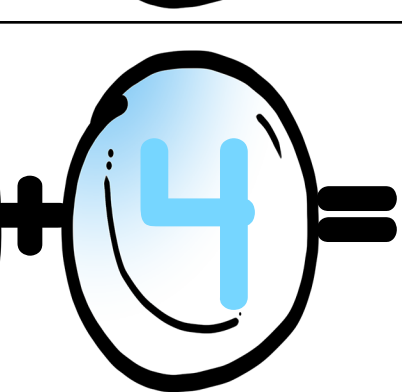

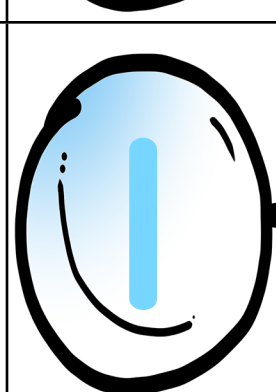

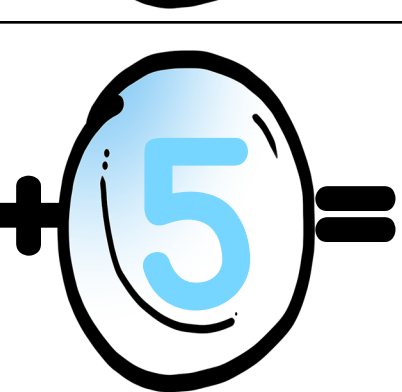

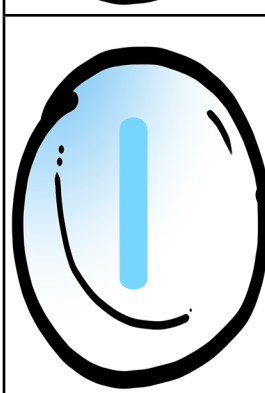

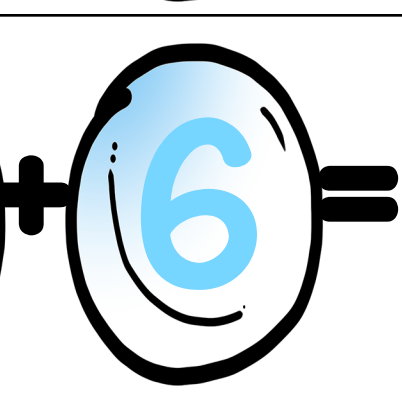

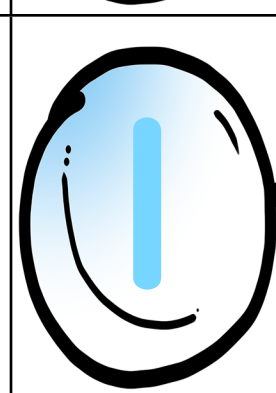

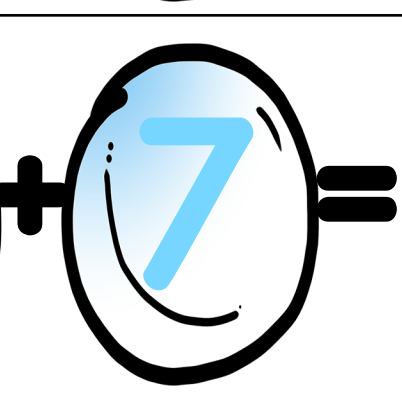

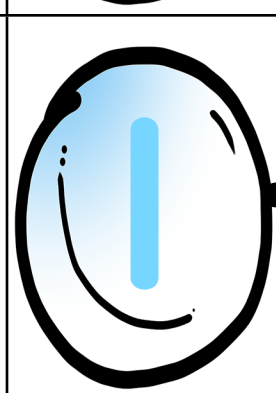

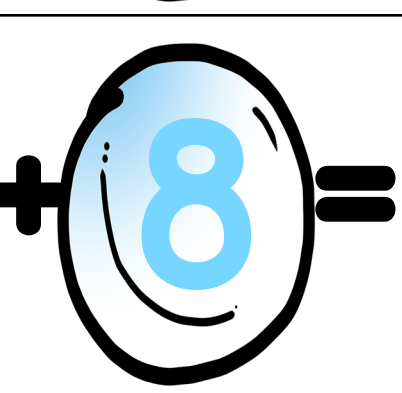

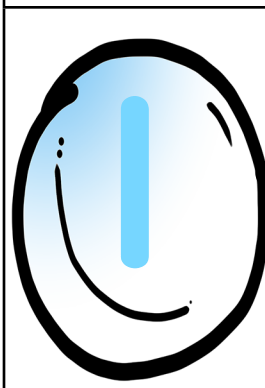

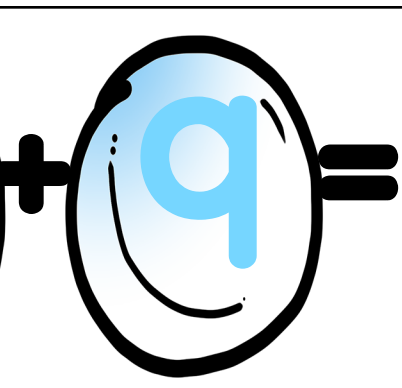

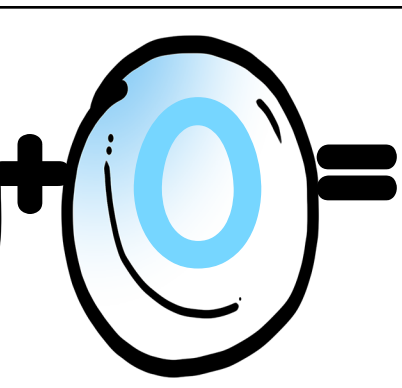

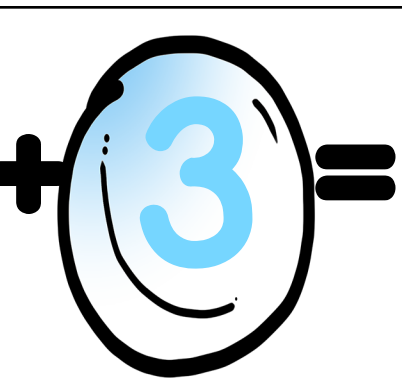

The student will select an addition fact card and place it on the rectangle with the addition fact representation in the sky.

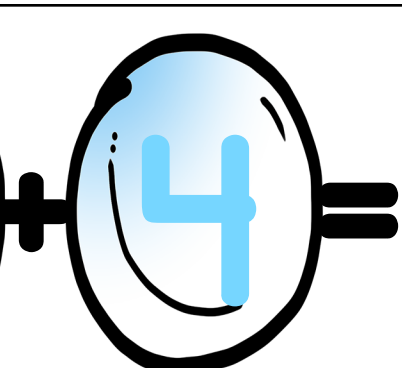

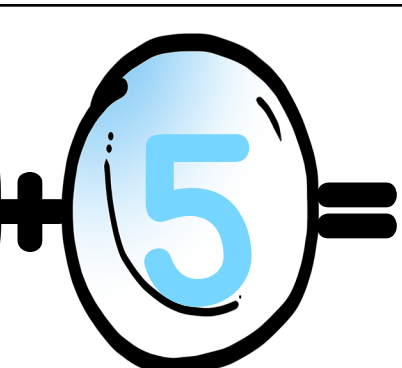

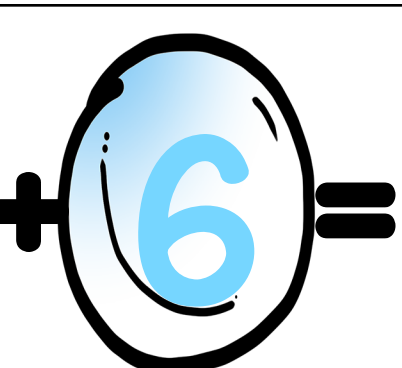

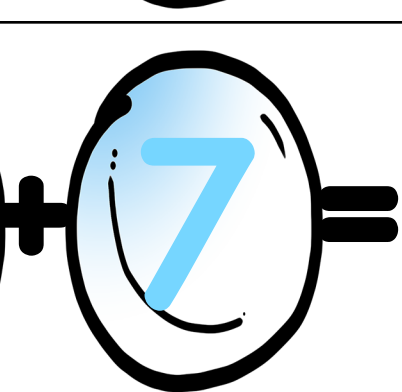

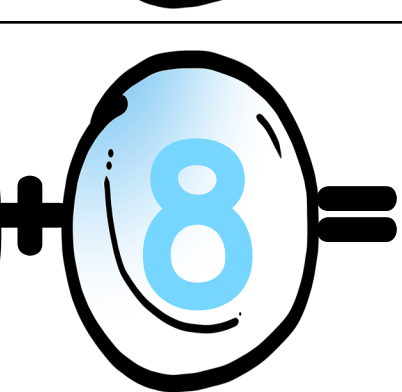

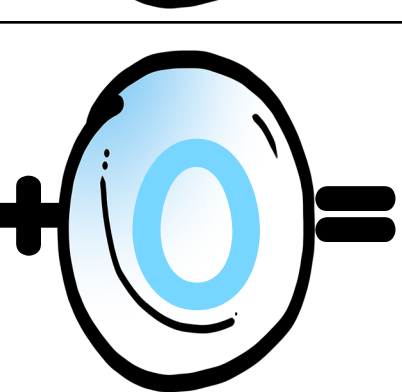

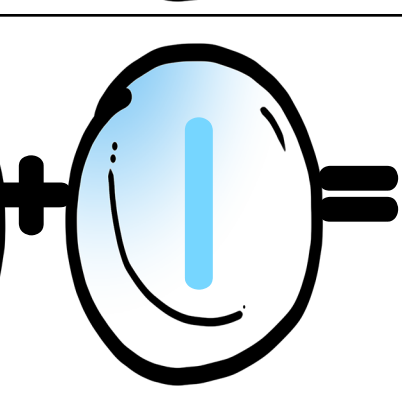

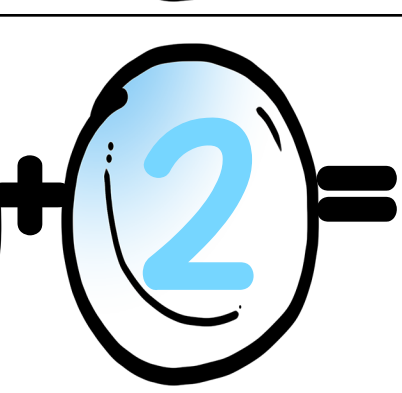

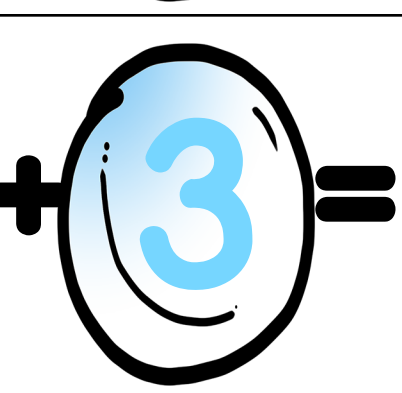

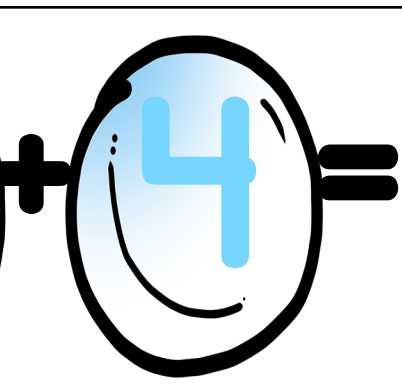

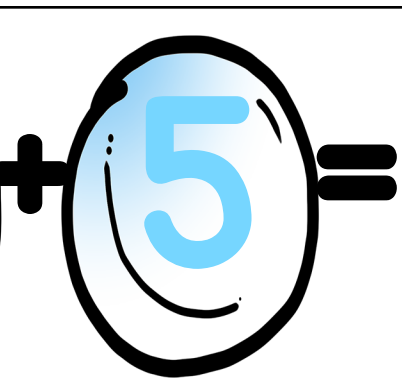

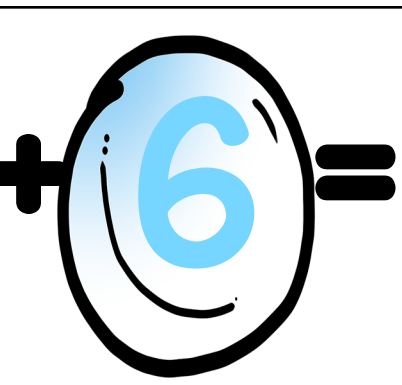

Then, they will collect the amount of snowballs shown on the card to represent the addition problem and place them on the snow pile.

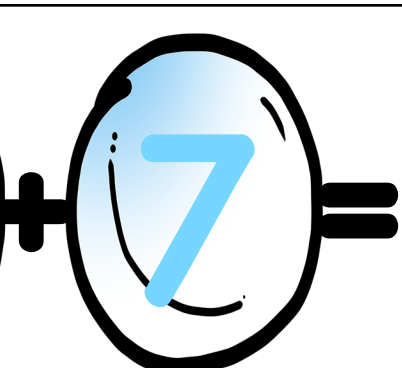

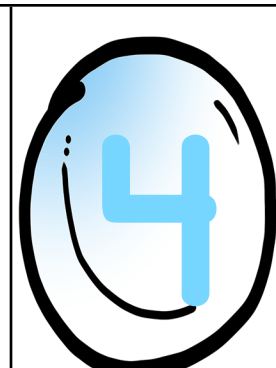

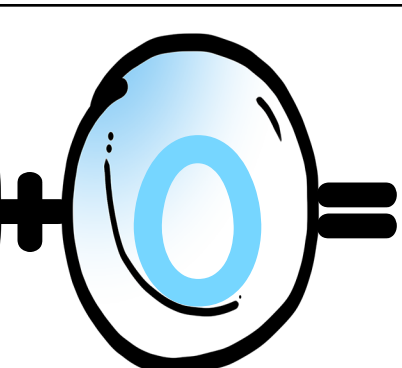

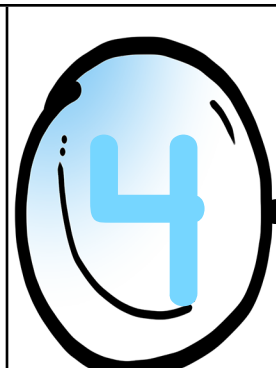

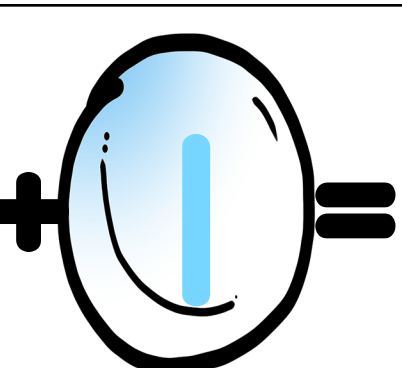

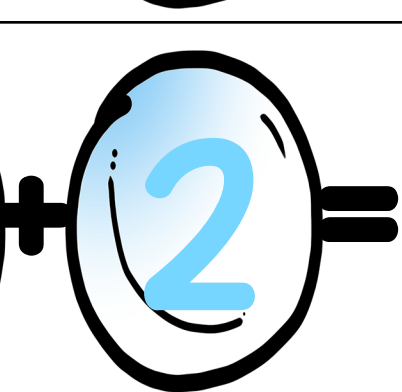

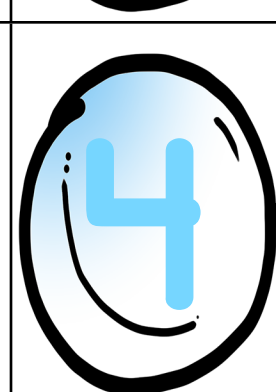

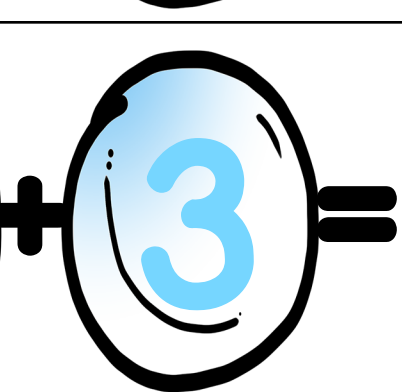

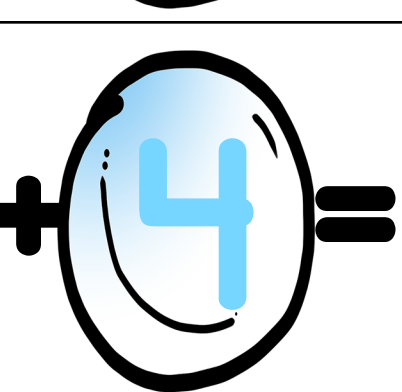

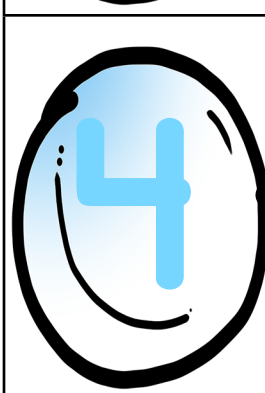

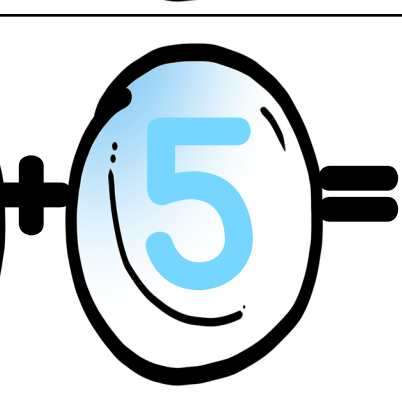

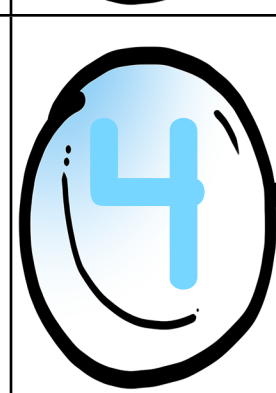

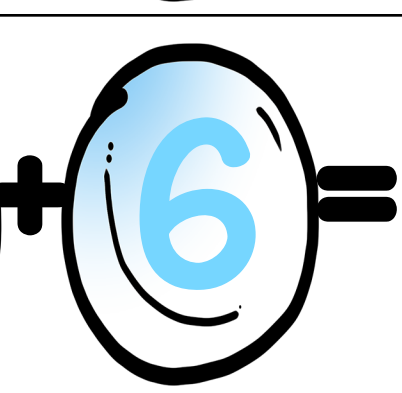

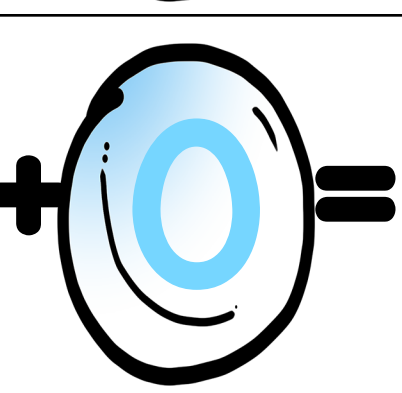

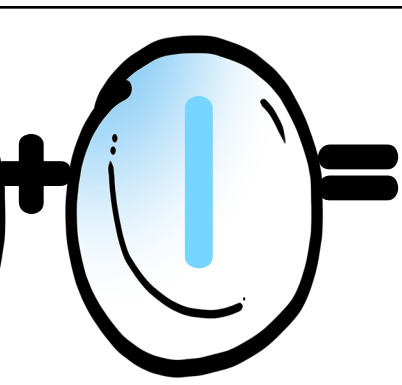

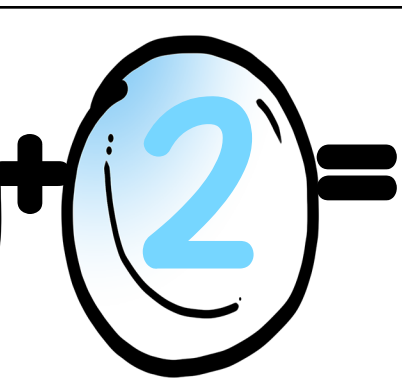

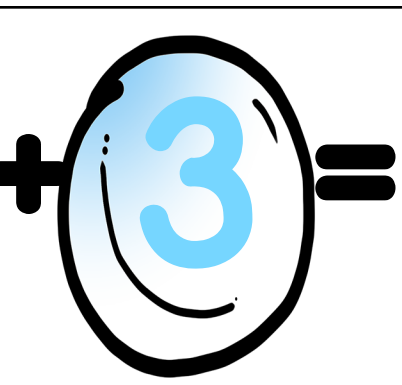

Count up the total amount of snowballs and find the matching numbered snowball. Place it in the square in the sky to complete the addition problem.

Say the addition problem out loud to help commit it to memory.
